

ACS-GHS May 2020 Newsletter

Upcoming Events

May 16th - 2020 ACS-GHS Scholarship Exam - **Cancelled**

May 18th - ACS-GHS Monthly Board Meeting (Online Only)

August 22nd - Climate Solutions Symposium

[Check our website and below for details on these upcoming events.](#)

Chemistry Themed Face Masks Available

To limit the spread of COVID-19, CDC recommendations to wear masks and social distance are likely to be with us for some time. Having chemistry on your mask can only help the cause. The ACS-GHS has one socially isolated chemist/seamstress who is making fabric masks as pictured. Masks have fabric ties and are made of quality quilting cotton - one side chemistry, one side crazy fabric.

Masks are \$10 each (+ \$0.50 shipping) and limited to 1 mask per purchase. All proceeds will go towards supporting future ACS-GHS chemistry activities and outreach programs. For more information on purchasing a chemistry themed mask, check out our [website](#). Stay healthy!

Chemists Celebrate Earth Day

ACS-GHS participated in a number of virtual events for the 50th anniversary of Earth Day on April 22nd. A number of students entered the Illustrated Poetry Contest for Chemists Celebrate Earth Week. The theme was Protecting Our Planet Through Chemistry and we look forward to sharing the select entries with you soon on our social media accounts. We thank everyone who participated all of this year's Earth Day activities and look forward to celebrating in person next year!

ACS Virtual Educational Resources

ACS has a number of educational resources available online. Everything from coloring books to Earth Day activities is available. Materials are targeted for all ages (kindergarten to college). Follow the [link](#) below to check out everything that is available.

Climate Solutions Symposium

The symposium is co-hosted by Climate Solutions for Texas and the Engineering, Science & Technology Council of Houston. For more information view the program [here](#) and to register [click here](#).

**Saturday, August 22nd
9am - 12pm**

Thinking about going back to school for a graduate degree? Check out the Chemical Engineering Programs at the University of Houston.

Guess the Molecule

I am a solvent in beverages, a feedstock for producing other chemicals, and—more recently—as a transportation fuel. What compound am I?

April's Answer: **Dimethyl Fumarate**
