Guess the Molecule - August Clue

I am an inorganic salt that prefers to dimerize and am highly used as a Lewis Acid catalyst. My hexahydrate version helps keep you cool in the heat.

What compound am I? *Answer must be submitted [here](#) by 11:59 pm on September 30, 2021 to be entered for the drawing.*

August's Answer: Whiskey lactone or β -methyl- γ -octalactone
